

TASK 1 = Cover letter template

Classify the following elements according to which part of the cover letter they belong:

- showcase your education, coursework, classes and academic accomplishments
- Sign off (Yours faithfully / (Yours) sincerely / Sincere Regards...)
- thank the recruiter for their time and consideration
- today's date / your name / contact details / recruiter's name and title / company name and address
- repeat your interest in the position and in the company
- mention previous experiences, skills and achievements
- Introduce yourself as a candidate
- give practical and precise examples to demonstrate your claims
- match those skills and experiences with the requirements and responsibilities mentioned in the internship description
- include a call to action for an interview
- say why you're interested in the position and in the company
- show you have researched the company's role, products, work culture, policy...
- explain why you're writing and how you came across the position
- provide contact information to end on a professional note
- Opening greeting (Dear Ms... / Mr... / Mrs... / Dear Sir or Madam, / Dear HR Manager / Dear Hiring Manager)

**HEADER**

-today's date / your name / contact details / recruiter's name and title / company name and address

OPENING PARAGRAPH

-Opening greeting (Dear Ms... / Mr... / Mrs... / Dear Sir or Madam, / Dear HR Manager / Dear Hiring Manager)

Introduce yourself as a candidate

-say why you're interested in the position and in the company

explain why you're writing and how you came across the position

BODY PARAGRAPHS (1 or 2)

-showcase your education, coursework, classes and academic accomplishments

-mention previous experiences, skills and achievements

-give practical and precise examples to demonstrate your claims

-match those skills and experiences with the requirements and responsibilities mentioned in the internship description

-include a call to action for an interview

-show you have researched the company's role, products, work culture, policy...

CLOSING PARAGRAPH

- Sign off (Yours faithfully / (Yours) sincerely / Sincere Regards...)
- thank the recruiter for their time and consideration
- provide contact information to end on a professional note
- repeat your interest in the position and in the company

TASK 2 = Watch the video and work on the following questions (source: <https://resumegenius.com/cover-letter-examples/internship-cover-letter-sample>)

PART 1 = Opening paragraph

1/ Why is it important to introduce yourself and to explain how you came across the internship offer?

It gives the hiring manager background information about why you have applied and let's you set the tone.

2/ What personal qualities make up for the lack of extensive professional experience?

Enthusiasm and a willingness to learn are of interest to the hiring manager. Remember they don't expect you to already have professional experience.

3/ What else should be mentioned in this part of the cover letter?

You should support your personal skills with an anecdote and tell them about your career goals.

4/ Find the words for:

Concernant / tomber sur / être à la hauteur des exigences / souligné(s), exposé(s) dans / officiellement / un atout pour

Regarding/ came across/ meet the necessary requirements/ outlined in/ formally/ an asset for

PART 2 = Body paragraphs

5/ What document can applicants rely on to draft this part of their cover letter?

Refer to the internship description

6/ According to the woman, what soft skills can demonstrate you would be an excellent intern?

Soft skills that are excellent to have are communication, research, time management and conflict management skills.

7/ Find the words for:

Pertinent / activités extra-scolaires / attirant, attrayant / se démarquer

Relevant/ extracurricular activities/ appealing/ stand out

PART 3 = Final paragraph

8/ What can applicants do to relate their skills and qualifications to the company's needs?

Do some on line research on their products, services and work culture.

9/ Find the words for:

Appliquer ses compétences à ... / environnement professionnel / détailler – développer davantage / dans l'attente de ...

Applying my educational background to/ work culture/ further detail my skills/ look forward to..

TASK 3 = Sample cover letters for computer science internships

- ✓ **Role play the recruiter:** Discuss which letter you found the most convincing and which applicant you would not interview. Explain your choices.
- ✓ Do the corresponding word search

LETTER 1

Shannon Mullins
Hiring Manager
Aetherwave

Dear Ms. Mullins,

I am writing to express my strong interest in the Computer Science Intern position at Aetherwave. As a highly motivated and dedicated computer science student, I am excited about the opportunity to contribute to your innovative company and gain valuable hands-on experience in the field.

From a young age, I have been fascinated by the power of technology and its ability to transform the world. This passion led me to pursue a degree in computer science, where I have developed a strong foundation in programming languages such as Java, C++, and Python. Through my coursework and personal projects, I have gained experience in software development, data analysis, and algorithm design.

What sets me apart as a candidate is my ability to apply my technical skills in a practical and creative manner. During my previous internship at XYZ Company, I had the opportunity to work on a team developing a mobile application that streamlined the customer onboarding process. Through this experience, I learned the importance of collaboration, adaptability, and problem-solving in a fast-paced environment. I am confident that my ability to think critically and my strong attention to detail will make me a valuable asset to the Aetherwave team.

Furthermore, I am drawn to Aetherwave's commitment to innovation and cutting-edge technology. Your company's reputation for pushing boundaries and creating groundbreaking solutions aligns perfectly with my own aspirations. I am eager to contribute my skills and knowledge to help drive Aetherwave's mission forward.

In closing, I would like to reiterate my enthusiasm for the Computer Science Intern position at Aetherwave. I believe that my technical expertise, passion for technology, and strong work ethic make me an ideal candidate for this role. I am confident that my dedication and eagerness to learn will allow me to make a meaningful contribution to your team. Thank you for considering my application.

Sincerely,
Erin Parks

Linda McGee
Hiring Manager
Dakota Software

Dear Ms. McGee,

I am currently a third year student in the Computer Science Program at Carnegie Mellon University, and am looking for a summer internship position in the Cleveland area. In looking at your web site, I was particularly interested in Dakota Software's emphasis on providing technology solutions in the areas of health and safety. As a candidate with a strong academic background, relevant experience, and communications skills, I am confident that I could make a positive and productive contribution to your organization.

My attached resume gives evidence of my strong performance in my coursework. I have been selected to the Dean's List over the past two semesters, and am also a member of the National Society of Collegiate Scholars. My coursework has given me a rich mixture of both the theoretical and practical sides of my field. For example, the discrete mathematics and theory classes of my freshman year contrasted well with Technology Consulting in the Community, an upper-level course that I am enrolled in where I actually am a technology consultant to a nonprofit organization in Pittsburgh, helping the organization utilize technology to further achieve its goals.

I also have past experience working in the field of computer science. Last summer, I worked as a web developer at Doveworks, a small Internet company in Messina, Ohio. I was responsible for maintaining and updating several of the company's web applications, and was the primary developer involved with the restructuring of an online solicitation application for the Cuyahoga County Department of Public Works. I used Microsoft Access in order to develop these database oriented applications. This internship gave me experience in working closely with end users in developing solutions.

I would like to meet with you to discuss the possibility of an internship position at Dakota Software. I will be in the Cleveland area between March 15th and August 30th. I will contact your office a couple of weeks in advance to set up a mutually convenient time for an interview. In the meantime, I may be contacted at the phone number and e-mail address listed on my resume. Thank you for your time and interest. I look forward to meeting with you.

Sincerely,

Daryl Lowe

321 Pine St, Toronto

Faizah Quraishi, Manager, Software Engineering Unit
 General Motors of Canada Ltd.
 1908 Colonel Sam Drive
 Oshawa, ON L1H 8P7

Junior Engineer Job # 3324

Dear Ms. Quraishi,

Having read about GM's commitment to innovation, along with the supportive family-like workplace culture, I was delighted to meet a number of GM team members who confirmed that what they enjoy most about working at GM is how everyone is encouraged and given the tools to strive and reach any goal they aim to achieve—both personally and professionally. As I am an innovative solutions-focused Software Engineering graduate, I am very excited about the possibility of joining the Software Engineering Unit of General Motors in the position of Junior Engineer as advertised on the GM website.

In my position as Software Engineer Intern with IBM, I was involved with project research, planning, design and testing within the Software Product Development team. Through innovative thinking I used computer aided devices to perform routine calculations creating an efficient project development time line. During the design stage I met with customers to better understand customer needs and perspectives. As I became more familiar with the needs of IBM's clientele I suggested, implemented and maintained test procedures and test scripts for new products.

In addition to my experience gained with IBM, I am graduating with an Honours Bachelor of Engineering degree from York University's Lassonde School of Engineering. My solid knowledge of computer software design and project development has given me the foundation to succeed in the software engineering industry. Skills in creating Use Cases and project planning have benefited both clients and past employers and enhanced my ability to provide creative thinking and problem solving. During my program I became interested in Global Positioning Systems and real time kinematic applications. Through my interest in the automotive industry, I have kept abreast of current product developments and trends, and am extremely excited about the ongoing development of customer-driven mobility solutions that create a personalized experience for GM customers.

I look forward to meeting with you and other members of the Software Engineering Unit to further discuss my suitability for this position. I can be contacted at (416) 765-4321.

Sincerely,

March 1, 2023

Apricot Softwares
Dear Mr. Smith,

I'm excited to submit my resume for the summer Application Design internship program at Apricot Software. Throughout my coursework and volunteer opportunities, I have developed a strong confidence in my user experience knowledge, design skills and coding abilities, so I believe I'm a worthy asset to your team.

In my three years at South Maple Leaf College, I completed beneficial coursework on cutting-edge design trends and best practices, including Principles of User Experience Design and Mobile Application Design, where I applied skills like user journey mapping, application wireframing and designing software for mobile devices and operating systems. Additionally, last semester I volunteered with a local non-profit that collects clothes and furniture to redistribute to families in need. I helped the web team update and re-launch an application that allows the community to find nearby drop-off points and schedule pickups. Due to my contributions, the donations increased by 10%.

I believe I can excel on Apricot Software's team, bringing careful attention to detail and graphic design skills to help the company differentiate itself from its competitors. This internship can help me grow my real-world experience in the technology industry and help me further develop and refine my application design skills. I look forward to hearing from you and speaking about this role further.

Sincerely,
Erica Garcia
